Computer Science 2025 Graduate @ The University of Sheffield

Hey! I've recently graduated from my three-year Computer Science course with a First Class Honours at The University of Sheffield. Despite my degree, my current plan is to find a full-time role in the service/sales industry, starting mid-September 2025. Not only to support myself, but I also enjoy interacting with people and hands-on, in-person work. I think that it would be a very valuable experience to learn new skills in areas outside of tech – I'm especially keen on expanding my people skills. Although I have limited experience in the mentioned industries, I love trying and learning new skills/domains. Granted some time and the opportunity, I'm confident in my ability and work ethic to exceed expectations in any role. Also, I do not need a sponsorship as I'll be on the graduate VISA.

Education

University of Sheffield

Bachelor of Sciences in Computer Science

Sheffield, UK

Sept. 2022 – July 2025

- Achieved First Class Honours with an 80% total average across all modules.

Work experience

Goodlord

Sheffield, July. 2024 – Aug. 2024

- 9-week summer software engineering internship at award-winning UK prop-tech firm.
- Quickly learned to efficiently adapt to unfamiliar codebases and technologies.
- Adopted common tech collaborative practices, and learned to effectively develop software in teams.
- Undertook real software feature development early, reducing support tickets and improving customer product understanding.
- Created first company A/B test on product placement to analyse poor conversion rates.
- Collaborated with other intern to implement improved signup data collection system.

Nippon Printing Sdn. Bhd.

Malaysia, 2016 – 2020

- A packaging and printing firm that designs and produces packaging solutions, typically for food businesses (e.g. traditional cookies, cakes, bread, and pastries).
- Worked periodically during school-term and summer breaks.
- Assisted in admin work, such as keying in sales data, managing quotations and invoices and organising physical files.
- Involved in more manual labour; tearing apart and assembling packaging cutouts, and packing and sorting finished products into boxes ready to be delivered.
- Collaboration and communication with other employees to harmonise work processes, and ensure high final product quality.

Skills and other stuff

- **Soft-skills:**
 - **Communication:** always willing to clarify doubts and ask questions, clearly express concerns, and establish progress in tasks.
 - **Teamwork:** enjoy collaborating with others to efficiently complete larger tasks, and able to smoothly settle decisional disagreements.
 - **Adaptability, problem-solving, and quick decision-making:** confident and calm in unfamiliar situations, break larger problems into more manageable ones, settle on conflicting choices quickly.
- **Languages:**
 - Use **English** natively.
 - Listen and speak **Chinese & Malay** at a beginner level.
 - Can read, write, speak and listen to **German** at a beginner level.
- **Hobbies:** football, bouldering, skating, calisthenics, lifting, content creation, graphic design
